RE: ML 50576-OBA; Gunnison Quarry, DOGM Permit S0390012.

Dear Mr. Haas:

The above numbered mineral lease covering state trust lands in T19S, R2E, SLB&M, Section 16, SE4NW4, W2W2NE4, was canceled for non-payment by final agency action on March 2, 2009. You no longer have a lease. You do, however, have a reclamation responsibility to perform reclamation as directed by the Utah Division of Oil, Gas & Mining, and to abate any hazardous conditions at the mine site and to rehabilitate the disturbed surface as required by state law.

The Trust Lands Administration authorizes you access to the subject property at your own risk and expense, for purposes incident to the timely performance of reclamation work as required by the Division of Oil, Gas & Mining. You may not remove or sell any of the leased substances in the course of performing reclamation of the site.

Failure to timely complete the reclamation work required by the Division of Oil, Gas & Mining may result in the forfeiture of any and all reclamation bond monies or collateral posted for this mine site. I encourage you to fully cooperate with the Division of Oil, Gas & Mining and the Trust Lands Administration to ensure adequate and timely reclamation performance.

Sincerely,

A handwritten signature in black ink, appearing to read "John T. Blake".

John T. Blake
Trust Land Specialist
